National Fire Agency,
Ministry of the Interior, R.O.C.

Safety Guidelines

EVs and Charging Equipment

Products meet the Chinese National Standards set by the Ministry of Economic Affairs and have passed quality inspections.

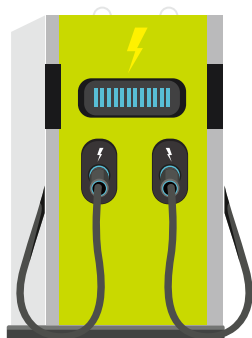

EV Charging

Always follow the manufacturer's user guide when charging, and schedule regular maintenance.

Professional Installation Required

Only certified electrical technicians or licensed contractors should handle installation and setup. Be sure to apply to Taipower for electricity connection.

Fire Safety Equipments

On 2024/4/24, the Standard for Installation of Fire Safety Devices based on Use and Occupancy was amended to include the option of automatic sprinkler systems. Electric vehicles and charging facilities must be located within the coverage area of automatic fire suppression systems.

In Case of an Accident

Call 119 right away to report it.
